product sheet

Hands-free Microphones

- Alcatel, Ericsson, Kyocera, Motorola, Nokia and Siemens types available (plus others).
- Uni & Omni-directional, Amplified & Un-amplified models.
- Full design & development facility.
- Various cables and terminations available.

Hosiden Besson has designed and manufactured a complete range of Hands-free Microphones used by ORIGINAL EQUIPMENT MANUFACTURERS, (OEM).

Commercial equivalents for Microphones used in many OEM Carkits are now available in smaller quantities with terminations to meet most applications. Technology available includes directional, omni-directional and amplified with anti-vibration mountings, wind and noise shields and GSM noise rejection filters. Units also have RFI de-coupling.

The microphones were originally designed for the OEM and due to a continually changing market place these products are available in smaller quantities.

Hosiden Besson will continue to offer this type of product alongside our traditional expertise of designing microphone technology utilising our in-house capabilities.

Hands-free Microphones

Company	Kit Description	Speaker Type
Alcatel	BE	Un-amplified Type 372U with special mount
Kyocera	V1, K1, K3	Un-amplified Type 372U with anti-vibration mount
Motorola	SYN 5708C SMN 4095A SMN 4103A FTN 6077A	Un-amplified Type 372U with 2.5mm plug Un-amplified Type 372U with Molex plug Un-amplified uni-directional Ball type with Molex plug Amplified fixed mount type with metal visor clip and Molex plug
Nokia	HFM 15	Amplified VDA directional Type 372A with anti-vibration mount and Molex plug
Siemens	Carkit Comfort (all types)	Amplified VDA directional fixed mount type with Molex plug Amplified VDA directional Type 372A with anti-vibration mount and Molex plug
Sony	C1, PTX431 & 435	Un-amplified Ball Type with Molex plug

Commercial equivalents of the above Hands-free Microphones can be supplied in low quantities and other types can be matched to customer samples as required.

Hosiden Besson continues to design and develop this type of product for volume production utilising our in-house capabilities and acoustic expertise.

Hosiden Besson also offers a complete design-to-manufacture service of Microphones to customers' specific needs. Please contact us to discuss your requirements.
