product sheet

Hands-free Speakers

- Ericsson, Kyocera, Motorola, Nokia, and Siemens types available (plus others)
- Ball, Bowfront, and Traditional models
- Full design and development facility
- Various cables and terminations available

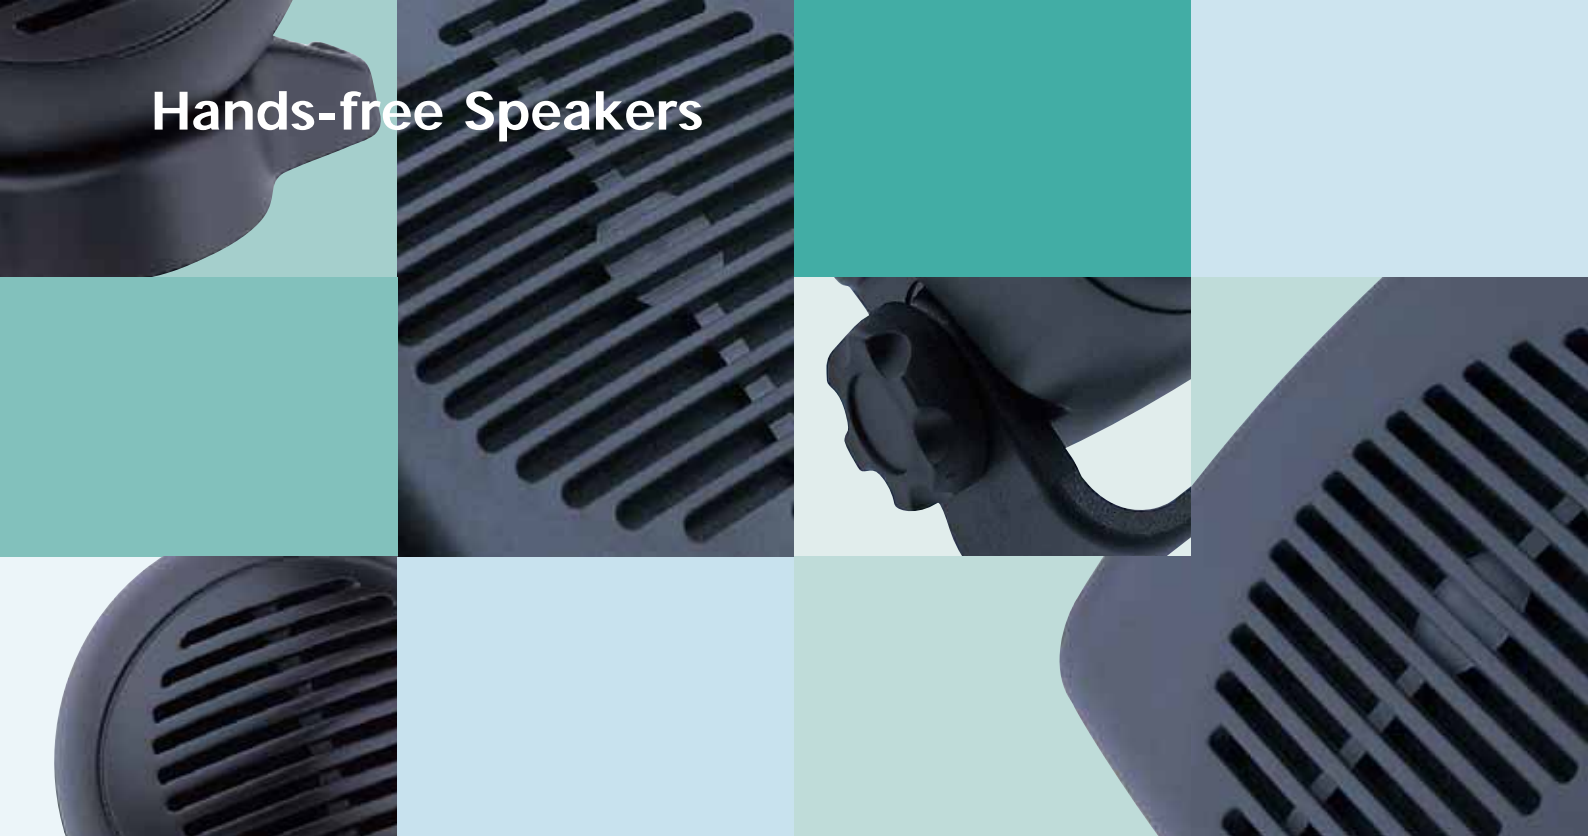

Hosiden Besson has designed and manufactured a complete range of Hands-free Speakers used by ORIGINAL EQUIPMENT MANUFACTURERS (OEM).

Commercial equivalents for speakers used in many OEM Carkits are now available in smaller quantities with terminations to meet most applications. The speaker shapes are traditional, ball, and bow-front types that are used by OEM's when offering Hands-free capability.

Hosiden Besson continues to design and develop this type of product for volume production utilising our in-house capabilities and acoustic expertise.

Hands-free Speakers

Company	Kit Description	Speaker Type
Ericsson	RLE 906 22/1 R1A	Bowfront Speaker
Kyocera	V1, K1, K3	Bowfront Speaker
Motorola	SSN 4018A SSN 4020A SSN 4256A GMSN 4078A	Standard Speaker Standard Speaker Bowfront Speaker Standard Speaker
Nokia	HFS 10	Standard Speaker
Siemens	Carkit Comfort (all types)	Bowfront Speaker Ball Speaker

Commercial equivalents of the above Hands-free Speakers can be supplied in low quantities and other types can be matched to customer samples as required.

Hosiden Besson continues to design and develop this type of product for volume production utilising our in-house capabilities and acoustic expertise.

Hosiden Besson also offers a complete design-to-manufacture service of Speakers to customers' specific needs. Please contact us to discuss your requirements.
